

Please preserve the Do not call in NJ in its current state.  
I have noticed a 100% drop in unsolicited calls and can't remember the last time we've been disturbed. Advertisers and marketers have enough avenues already at their disposal to reach americans (newsprint, internet, billboards, buses, transit hubs, television etc.) Telemarketing is by far the most intrusive form. Consider tax paying americans before you consider the advertising/marketing lobby.
